

ZOMATO RTM (Requirements Traceability Matrix)

ID	Ass. ID	Requirements Description	Business Need	Project Objective	Requested By	Department	WBS (Work Breakdown Structure) Element	Specification	Design	Test Cases
FUNCTIONAL - REQUIREMENTS										
BR-1	BG-1	Identify segments contributing profit	Pricing optimization and Revenue growth	Analyze patterns in cost and rating	Stakeholders	Finance / Strategy	Pricing and Customer Experience Analysis	Price categories and cost analysis	EDA	Validate correlation between price and rating.
BR-2	BG-2	Provide good restaurant recommendations	Better customer experience	Decrease Churn rate and increase revenue	Product Team	Product	Search Module	Filters (location, rating, cuisine, price range)	UI + backend filters	Filter accuracy test
BR-3	BG-3	Make the platform personalized	Customer retention	Improve customer engagement	Product Team	Data Science	Recommendation System	Preference-based suggestions	ML algorithms	Recommendation relevance test
BR-4	BG-4	Optimize restaurant partner performance	Partner success & retention	Provide performance insights	Restaurant Owners	Operations	Partner Dashboard	Ratings, orders, feedback	Dashboard UI	Metrics validation
BR-5	BG-5	Expand to untapped locations	Market expansion	Identify top locations	Management	Marketing	Location Analysis	Frequency of users in each location	EDA	Validate top locations.
BR-6	BG-6	Improve dining strategies	Increase sales	Identify popular cuisines	Marketing Team	Marketing	Cuisines Analysis	Cuisine frequency	EDA	Validate top cuisines
BR-7	BG-7	Increase online ordering adoption	Revenue & accessibility	Analyze online order trends	Business Team	Operations	Order Behavior Analysis	Online vs offline stats	EDA	Validate order distribution
BR-8	BG-8	24/7 Customer Support chat integrated inside platform	Customers can get help instantly	Improve customer experience	Stakeholders	Product	Customer Support Module	Real-time chat interface available 24/7 with AI-based responses and query handling	Integrate OpenAI API with backend and frontend chat UI for real-time messaging	Verify chat response time (<3 sec), validate query accuracy, test multiple user interactions, ensure 24/7 availability

NON-FUNCTIONAL REQUIREMENTS										
BR-9	BG-9	System Usability	Easy Usage	Improve satisfaction.	Customers	UI/UX	System Blueprint	Simple interface	UX design	User testing
BR-10	BG-10	System Security	Data protection	Secure Browsing history, Booking history and Account details	Customers	Product	Security Module	Data encryption	Secure DB	Security testing
BR-11	BG-11	System Scalability	Handle large traffic	Support many users at the same time	Stakeholders	Product	Scalability Module	High concurrency	AWS Cloud infrastructure	Stress test
BR-12	BG-12	Data Accuracy	Correct Decisions can be made	Reliable analytics (both exploratory and predictive)	Business	Data	Data Pipelines Preparation Module	Clean and accurate dataset	Data ingestion + Preprocessing	Data inspection
